

Scaffoldings

plettac Sp. z o.o.

The company's current headquarters in OSTRZESZÓW, Wielkopolska Province

Design of the new headquarters in Ostrzeszów
– commencement of works scheduled for 2010

plettac Sp. z o.o.

The history of BIS plettac goes back to September 4th, 1991, with the opening of the company's main headquarters in Ostrzeszów. As a result of dynamic changes in the construction sector and the company's continuous development it has become a part of the [Bilfinger Berger Industrial Services GmbH](#) group, providing services to the construction industry. The company has over 500 employees and is the leader of the Polish scaffolding industry. In 2009 the company's turnover amounted to approximately PLN 80 million.

The active quest to keep up with our customers' needs is the reason the company has opened branches in locations where the largest concentration of contracts is to be found. BIS plettac has branches in Warsaw (since 1994), Dąbrowa Górnicza (since 1999) and Szczecin (since 2009). Almost from its inception the company has maintained a branch in Germany - initially in Gelsenkirchen and currently in Siegen.

BIS plettac specializes in scaffold erection, dismantling and rental. The high quality of our services and the continuous expansion of the company are proven by the long list of spectacular projects we have completed in Poland and abroad. The company is a member of the following institutions:

- Polish Economic Chamber of Scaffolding (PIGR),
- Polish Chamber of Power Industry and Environment Protection (IGEiOŚ),
- Polish-German Chamber of Industry and Trade (AHK).

1991

Establishment of plettac Sp. z o.o.

2000

Merger with Arnholdt Rusztowania of Gdańsk and change of the company's name to plettac serwis Sp. z o.o.

2003

Purchase of 80% of the company's shares by Rheinhold & Mahla AG from Munich

2004

Change of the company's name to: R&M plettac Sp. z o.o.

2007

Change of the company's name to: BIS plettac Sp. z o.o.

“Your competent partner
in conquering altitudes”

Introduction

With approximately 20 years of experience on the market, BIS plettac has become the leader of the Polish scaffold industry. The company offers high-quality services and demands its employees hold extensive qualifications in accordance with its motto: “Your professional partner in conquering altitudes”. Highly-qualified staff with professional experience at construction sites in Poland and abroad is the key element of BIS plettac’s success. Thus, we can meet the challenges and requirements of even the most demanding customers.

Bolesław Janik
President of the Board

Full customer satisfaction from the performance of projects is the basis for further effective cooperation. The advantages for all the sub-contractors working on a given project which result from the performance of a large scaffolding contract by only one contractor are enormous. This makes construction site management processes much more efficient. The company’s philosophy, reflected by the slogan “Solutions for the Industrial Services”, is clearly visible in the activities it undertakes. We are open to winning new markets and the service package we offer is continuously expanding to adjust to customers’ needs. Customer satisfaction is always the ultimate measure of the success of these activities.

Piotr Kraszkiewicz
Member of the Board, Production Director

The export of scaffold erection works has always been one of the highest priority areas of the activity of our company. Export has been, and continues to be, the driving force for BIS plettac’s development. It indicates the paths for progress and facilitates implementation of modern scaffold technologies and systems. We are able to win large, profitable and prestigious contracts because our company guarantees good performance and wins the confidence of investors. Projects completed by us have become a permanent fixture on the scene of large industrial factories and construction sites in Poland and abroad.

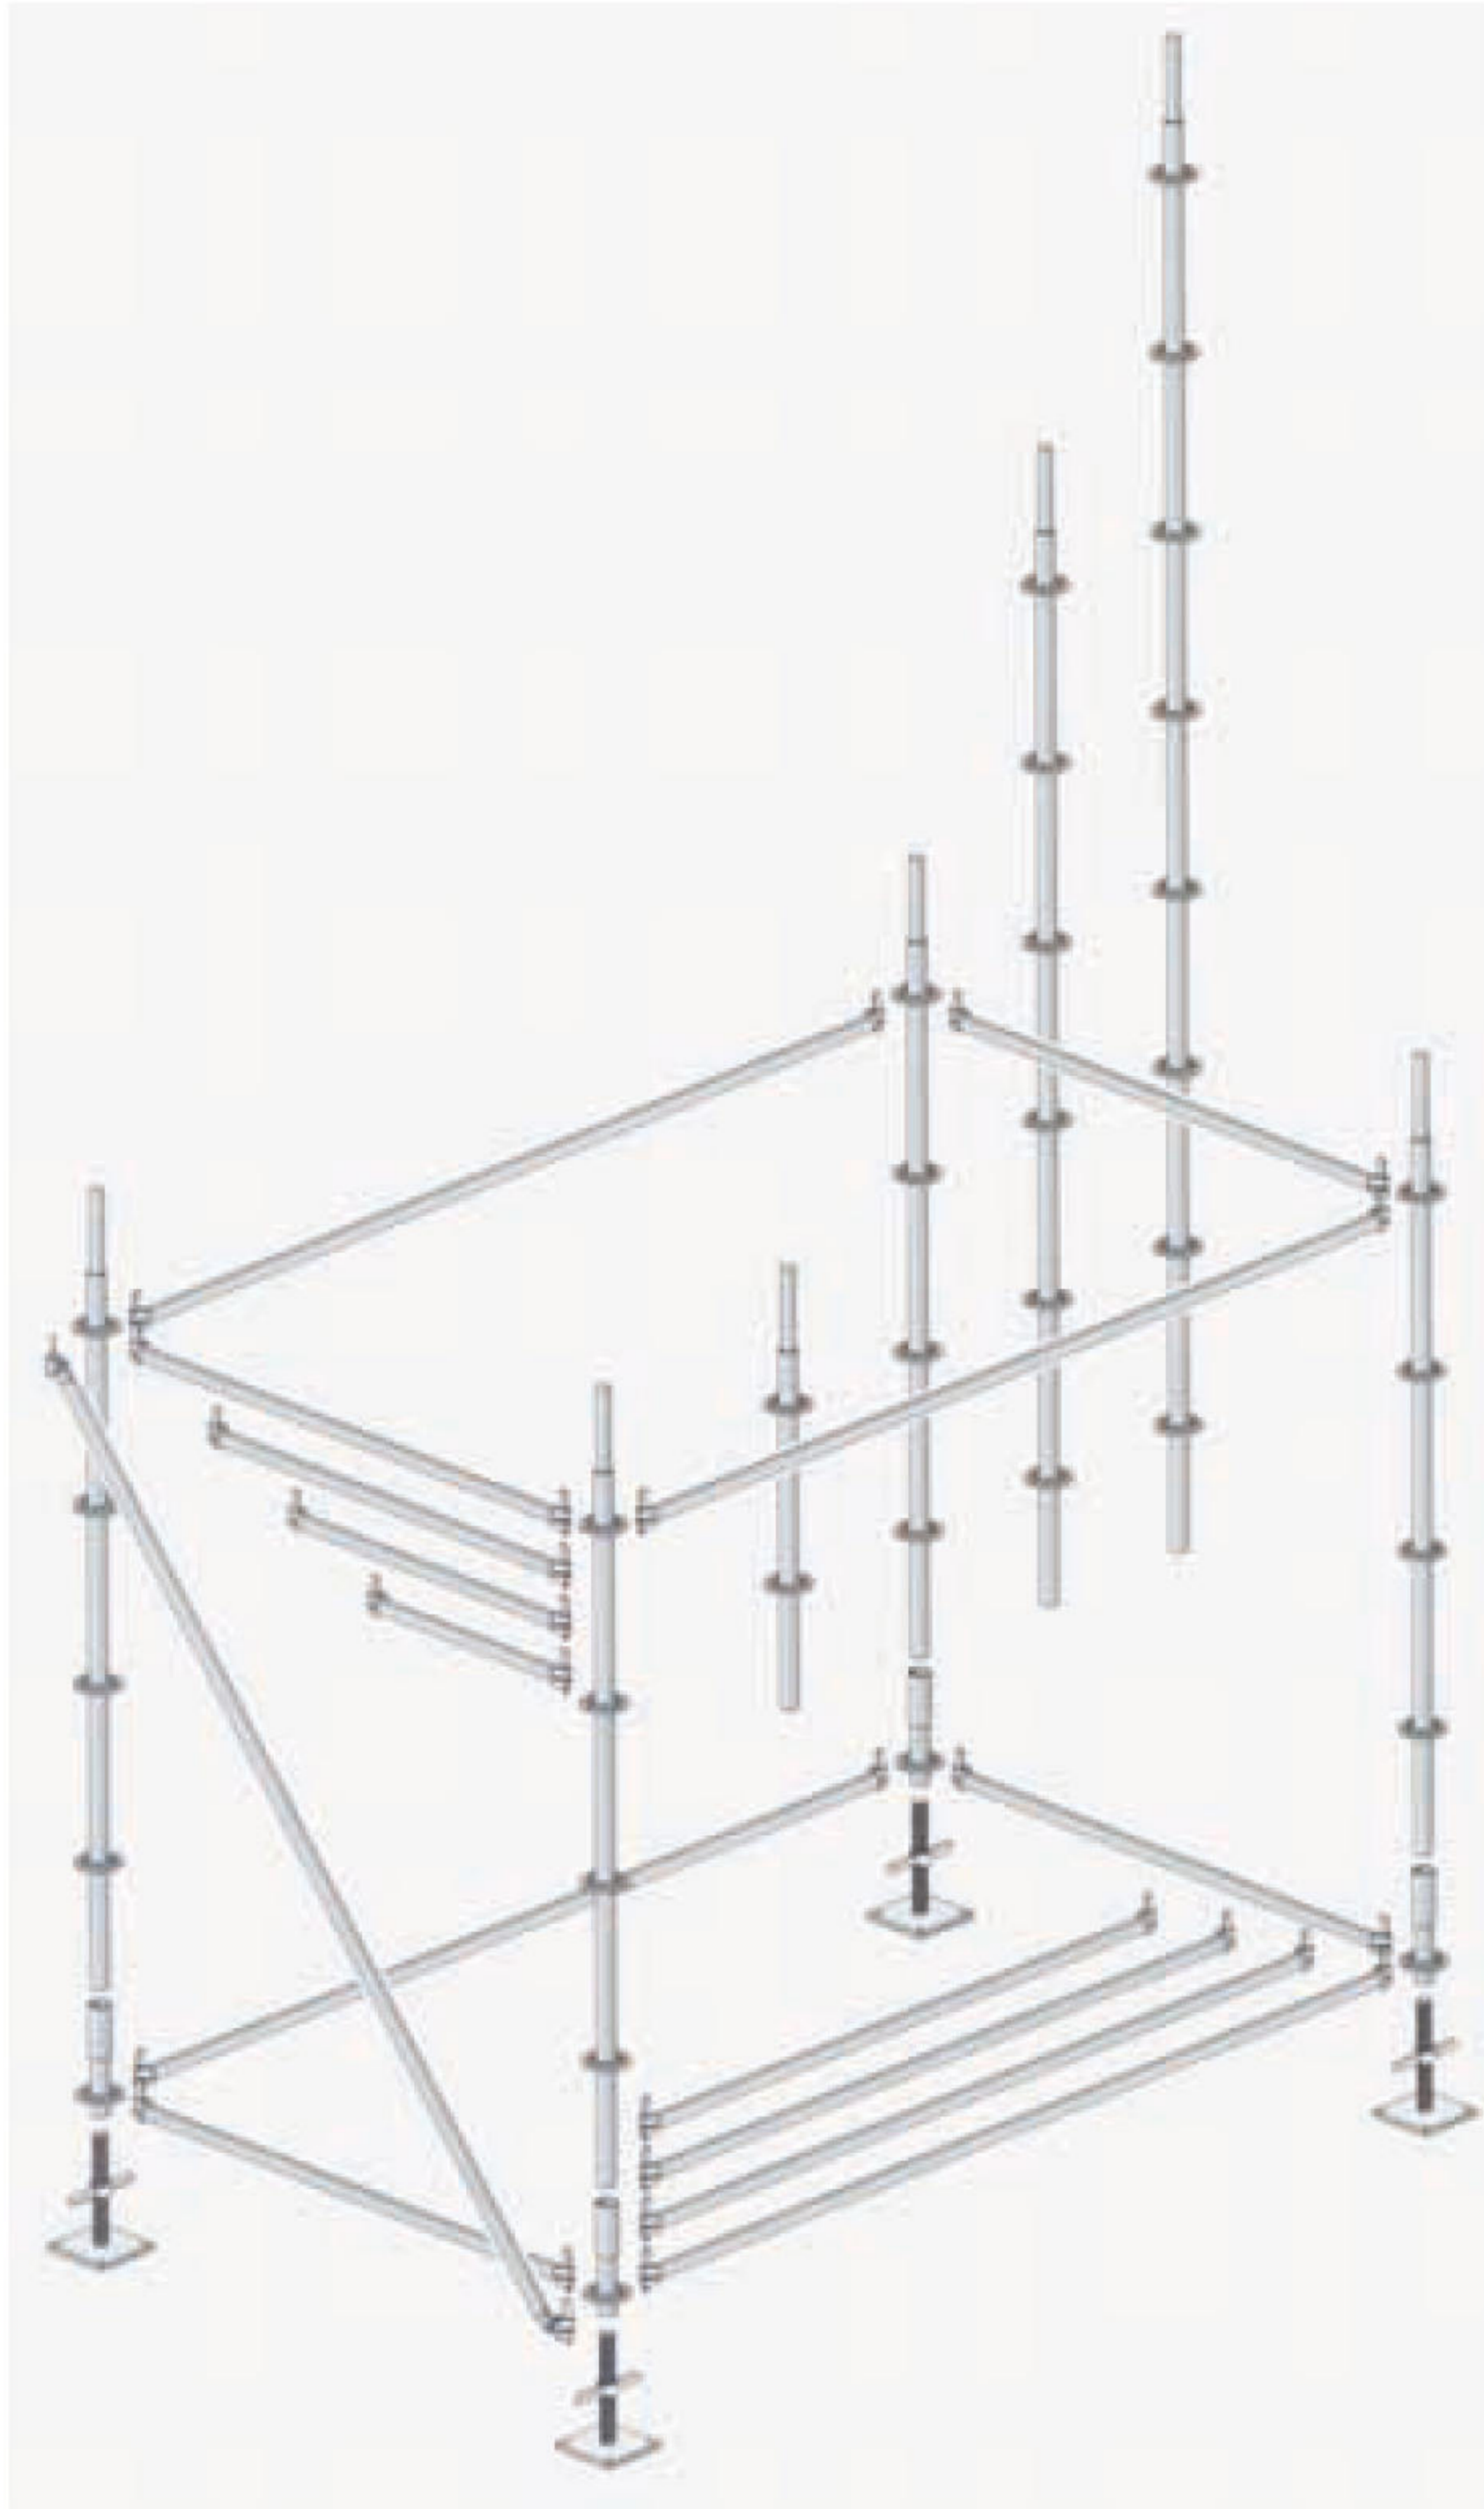

Roman Rogoziński
Member of the Board

The efficiency and flexibility in the performance of tasks entrusted by customers are crucial to creating a good image of every company. This efficiency involves not only successful delivery of services, but also a series of administrative activities - frequently invisible to the customer - that demand flexibility and quick decision making. This is how our Human Resources, Salary, Accounting and Finance Departments function. We consolidate the activities of these departments in order to incorporate them into the service process and make them invisible from the outside. We efficiently navigate through the maze of statutory regulations providing our customers with certainty that we are in compliance with all legal requirements.

Paweł Zieliński
Member of the Board, Finance Director

Basic information

Our offer

Scaffolds are necessary in order to perform work at heights. Indeed, they make it possible to access places that are typically difficult to reach. The need to get to such places is the basis of the company's offer, which focuses on expansive undertakings, primarily industrial projects. BIS plettac offers the following range of services:

- erection, dismantling and rental of scaffolds,
- 24-hour-a-day scaffold services,
- scaffold structure design.

BIS plettac's strength relies on:

- a wide range of modern scaffolds,
- comprehensive services,
- highly-qualified staff,
- a large transport fleet,
- many years of experience gained in Poland and Europe.

Our activities encompass:

- the energy industry,
- the petrochemical industry,
- other industries,
- general construction services,
- sacral construction services.

Scaffolding services Industrial construction

Energy industry

We place scaffolds and working platforms in power and CHP plants. Our services are mainly related to the construction, modernization and scheduled inspection of such equipment as:

- boilers,
- flue-gas desulfurization systems including absorbers and flue-gas ducts,
- air pipes / ducts,
- cable routes,
- others.

Petrochemical industry

We construct supported and suspended scaffolds for:

- pipeline trestles,
- containers.

Other industries

Our services support various industries including:

- cement plants,
- steelworks,
- mines,
- sewage treatment plants,
- shipyards,
- sugar factories.

6

Industrial construction Examples of completed projects

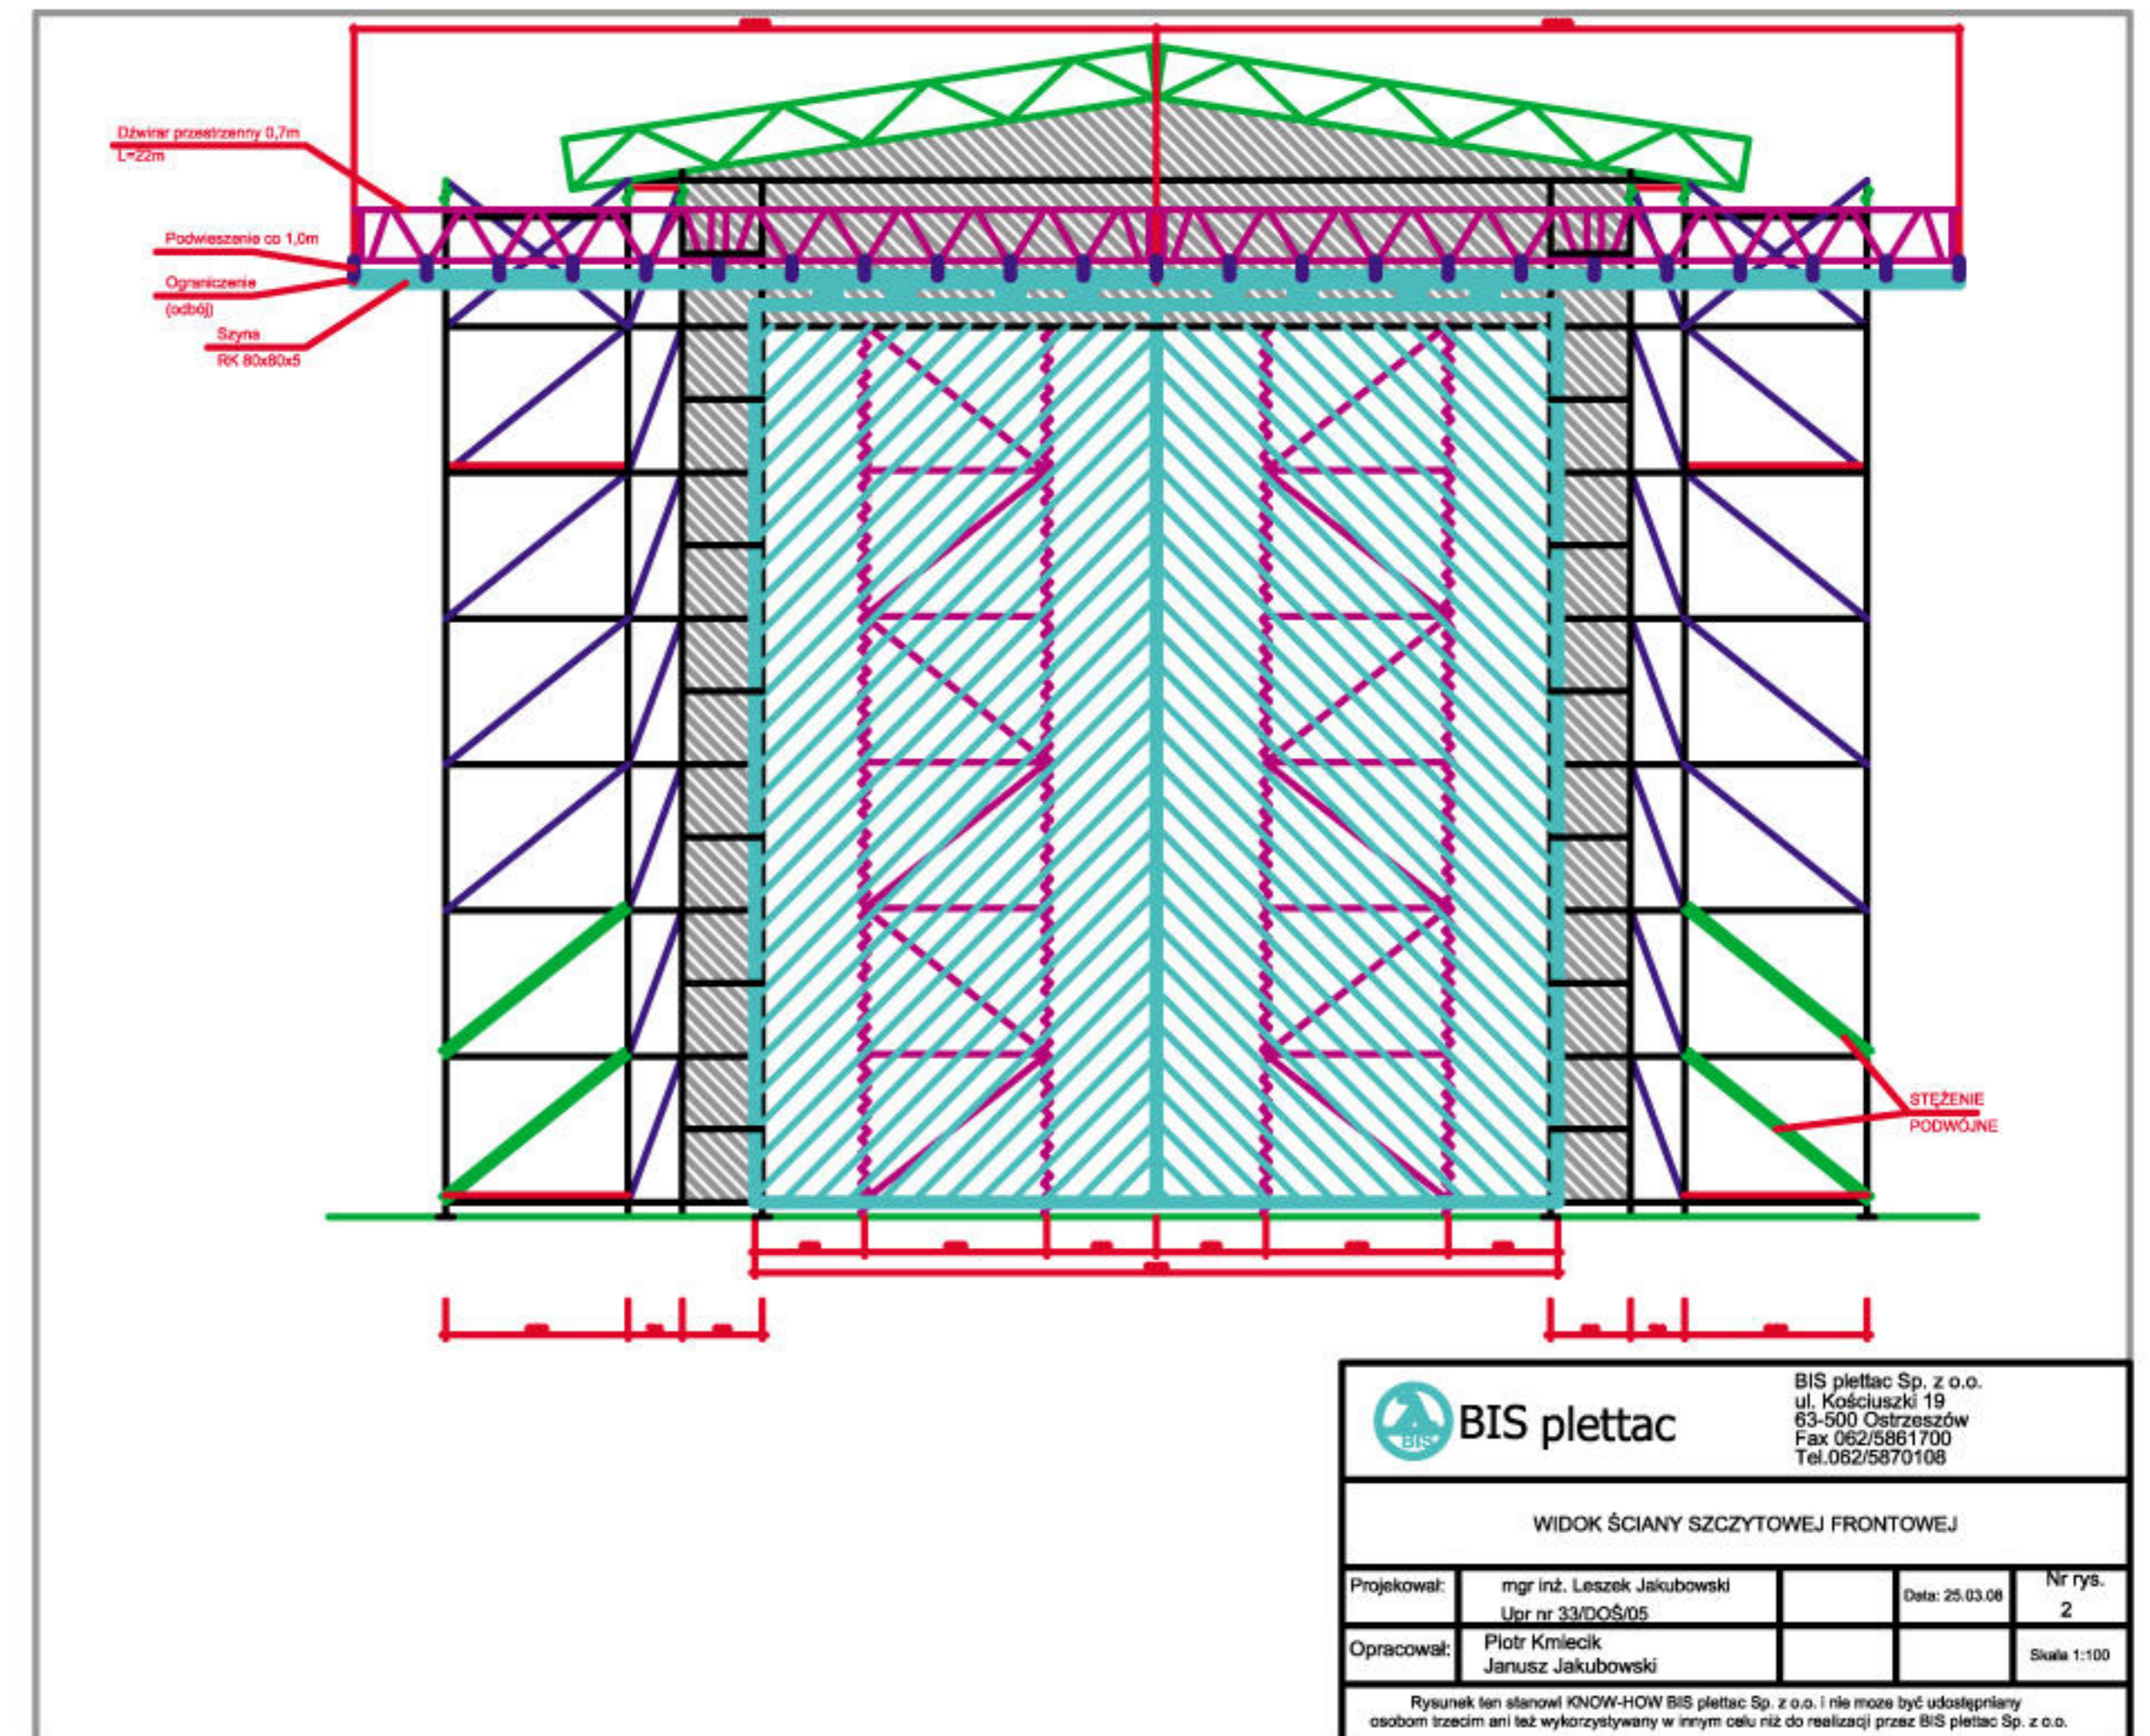

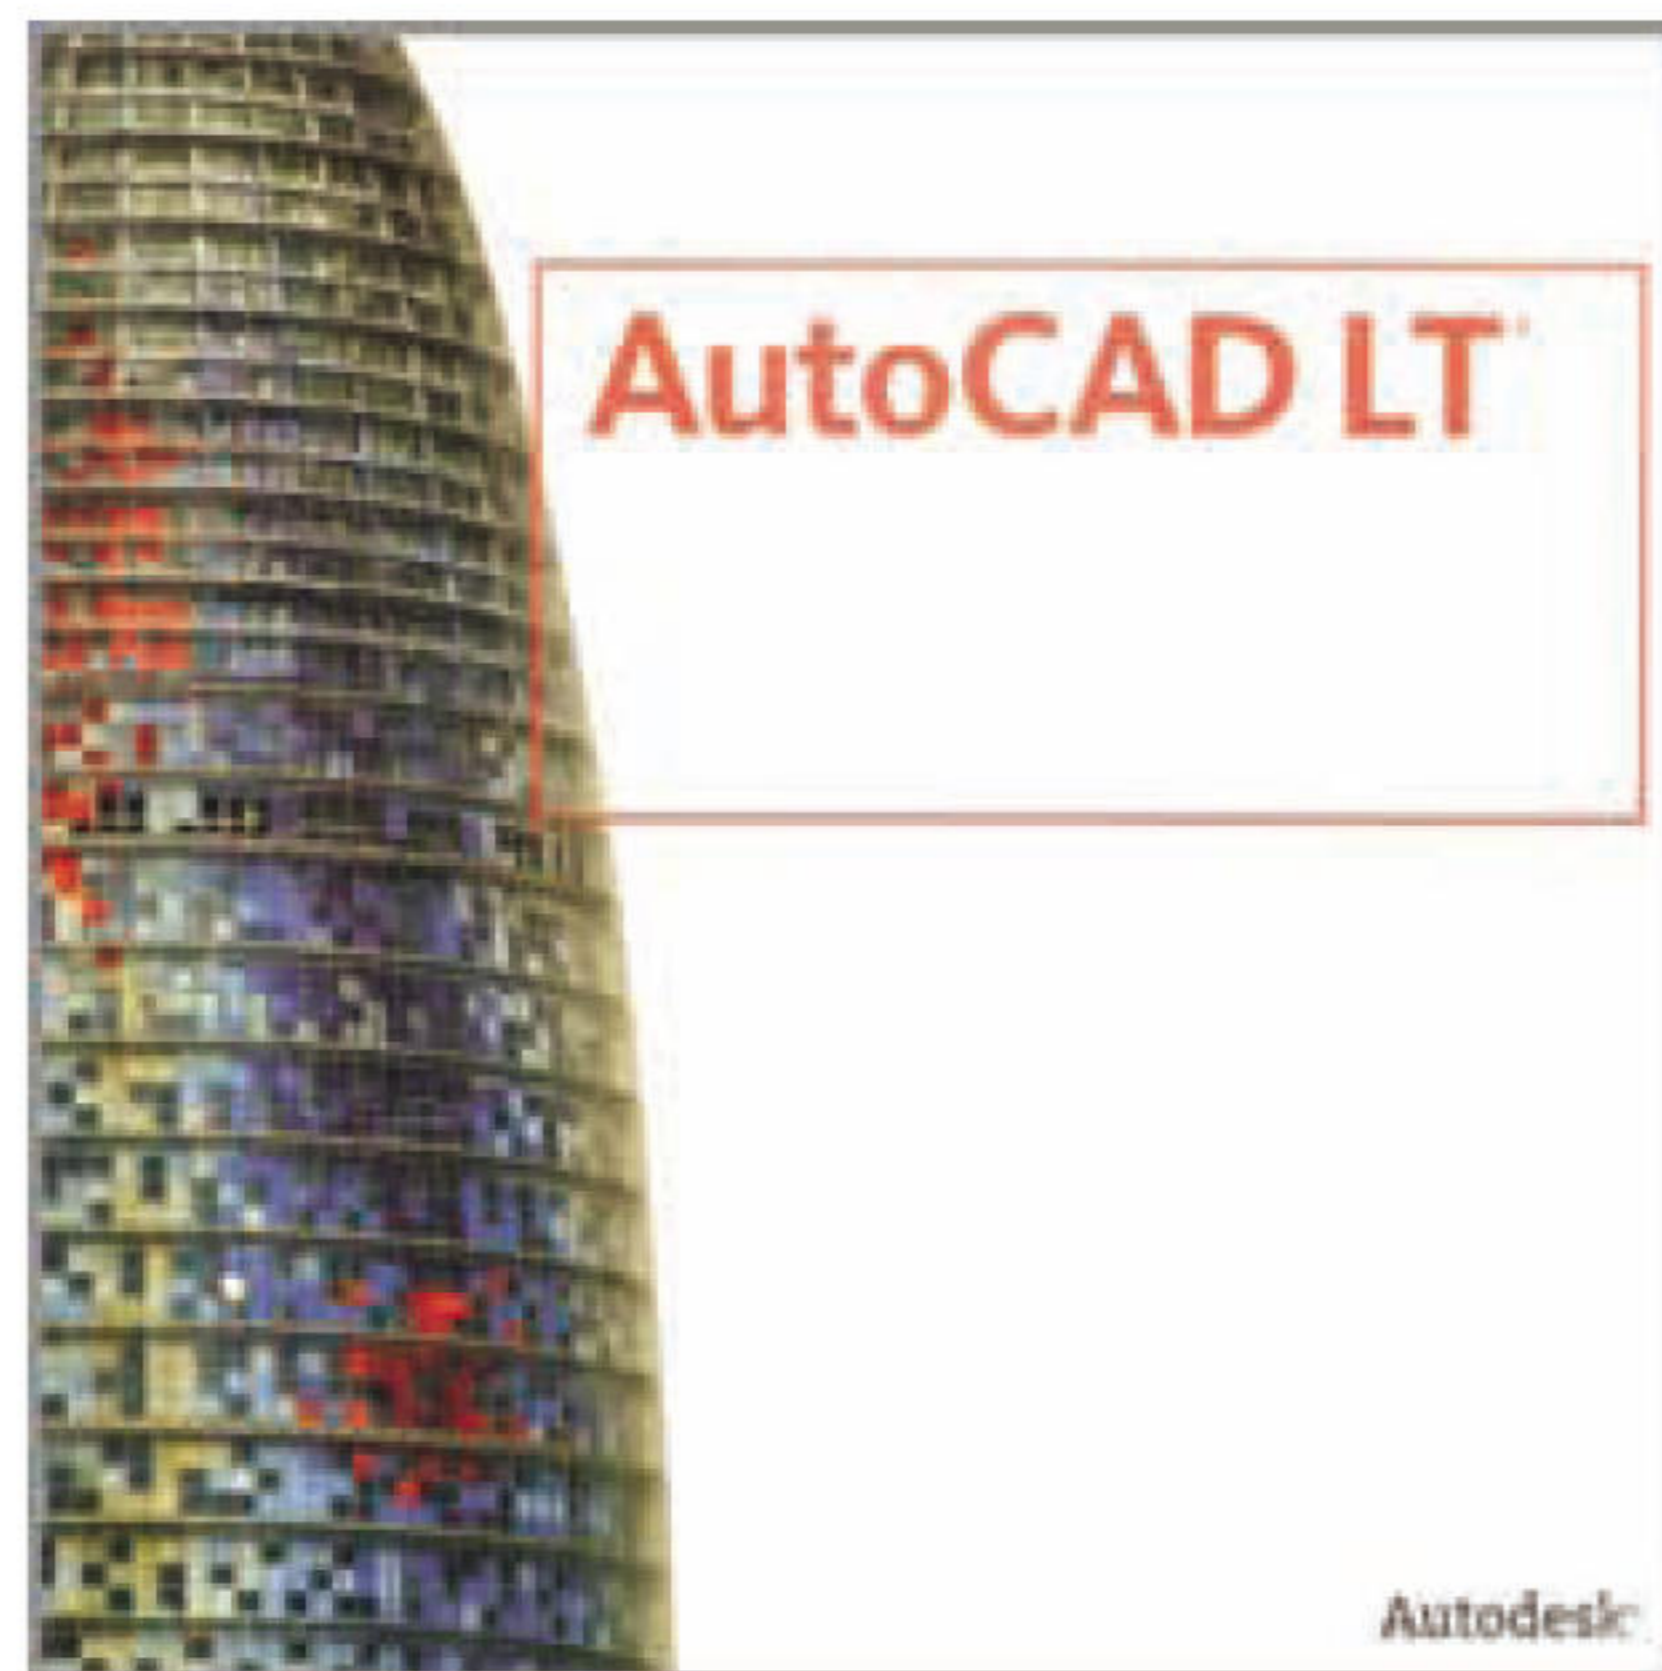

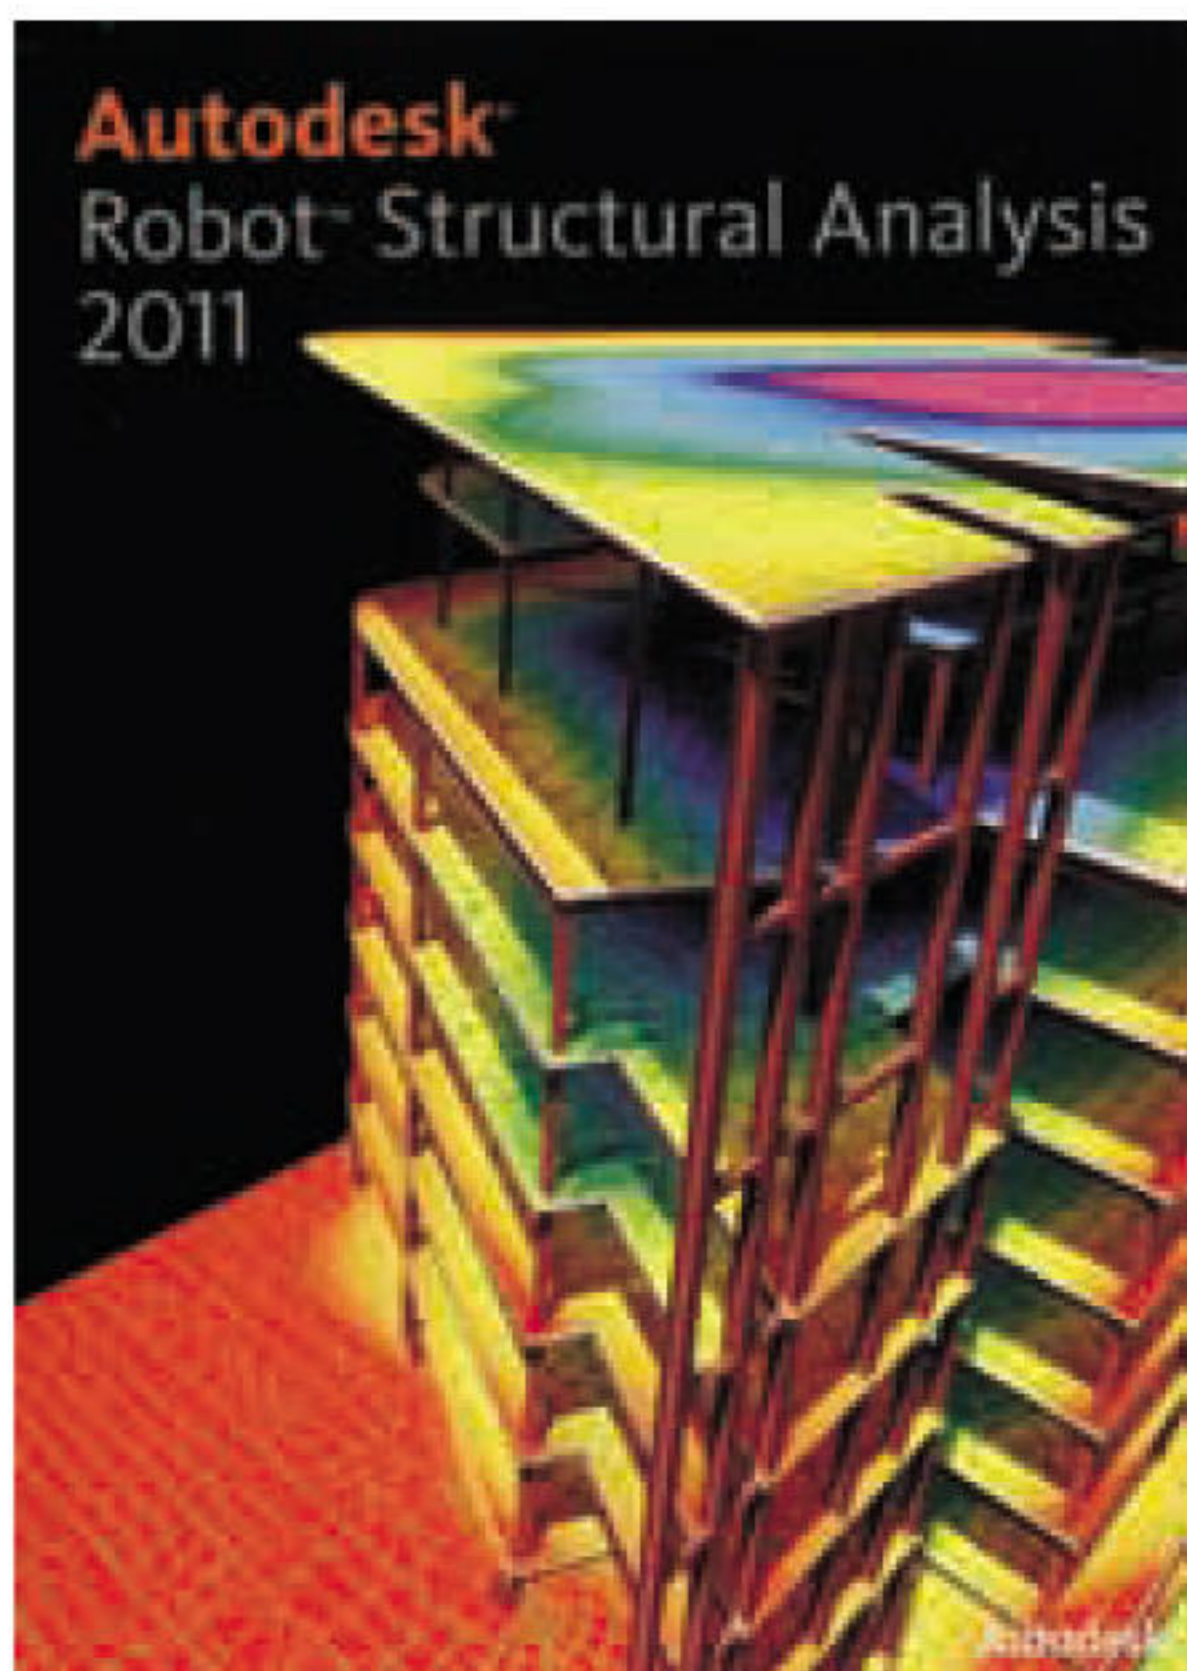

Industrial construction is the greatest test for the qualifications of a scaffolding company. In this field we need to face even the most sophisticated needs, and we deliver outstanding solutions to our customers. Our know-how helps our customers to complete projects quickly and effectively. BIS plettac has executed many large contracts with leading industrial companies in Poland and Europe.

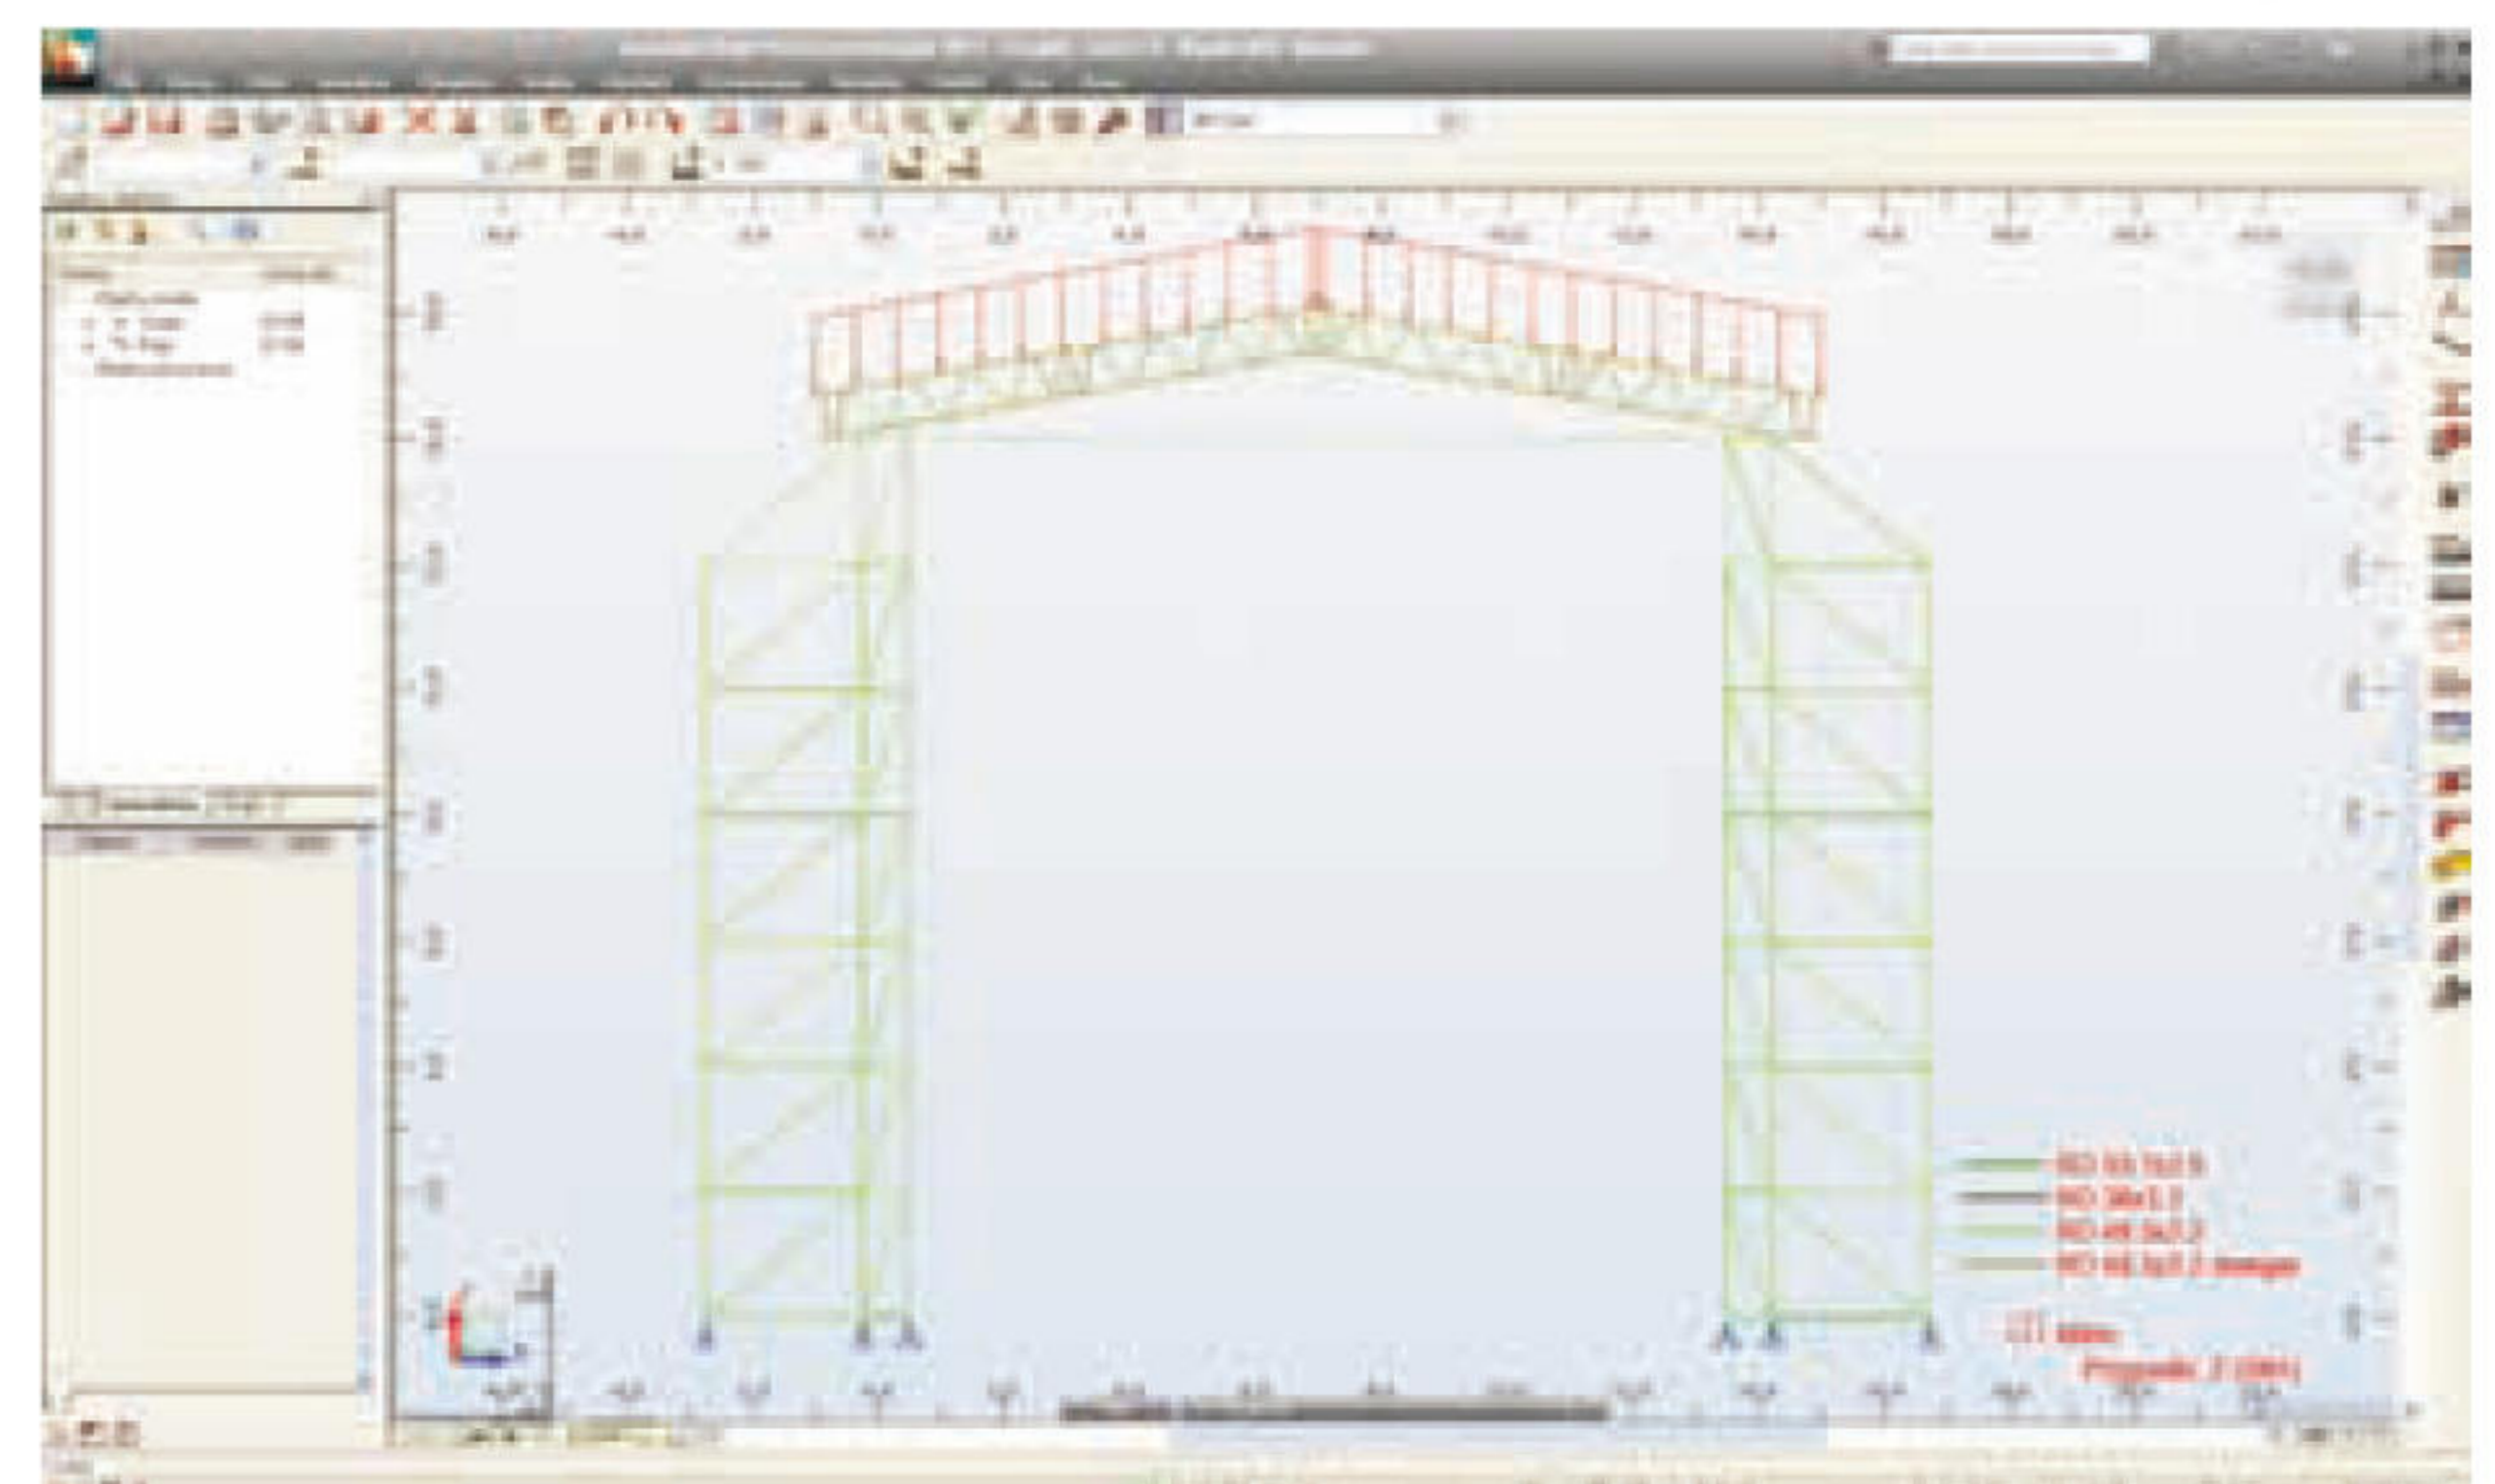

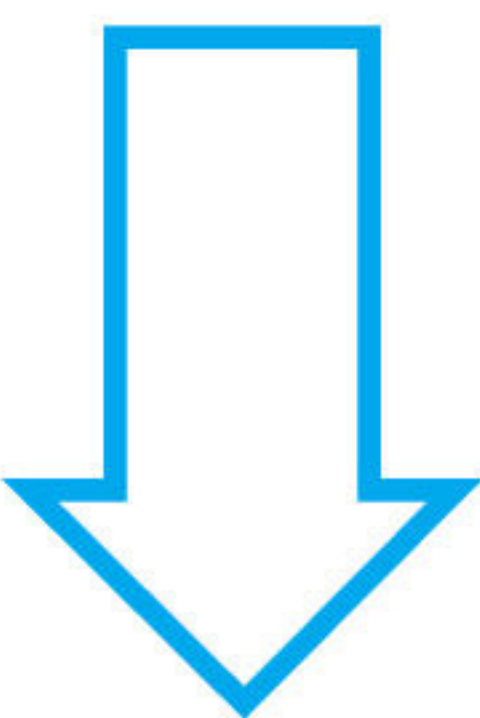

Scaffolding services Design

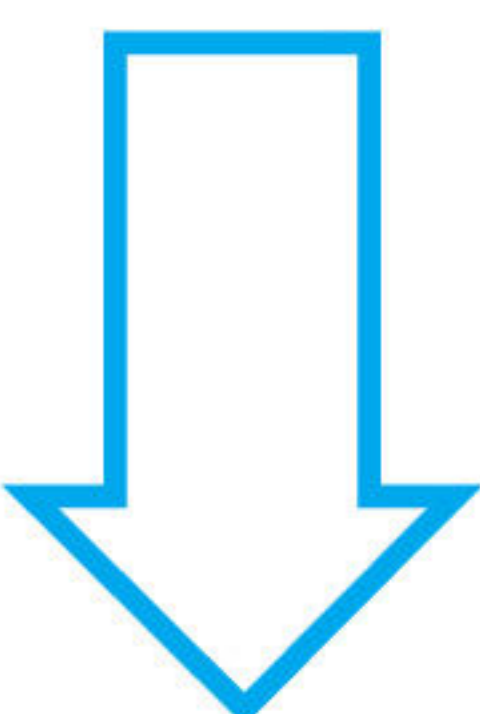

BIS plettac Sp. z o.o. has many years of experience in scaffolding design. We prepare technical documentation for scaffolds, static calculations and schemes for erection. Our designers are fully licensed to design for structural and construction purposes. Our designers, in their work, make use of professional software.

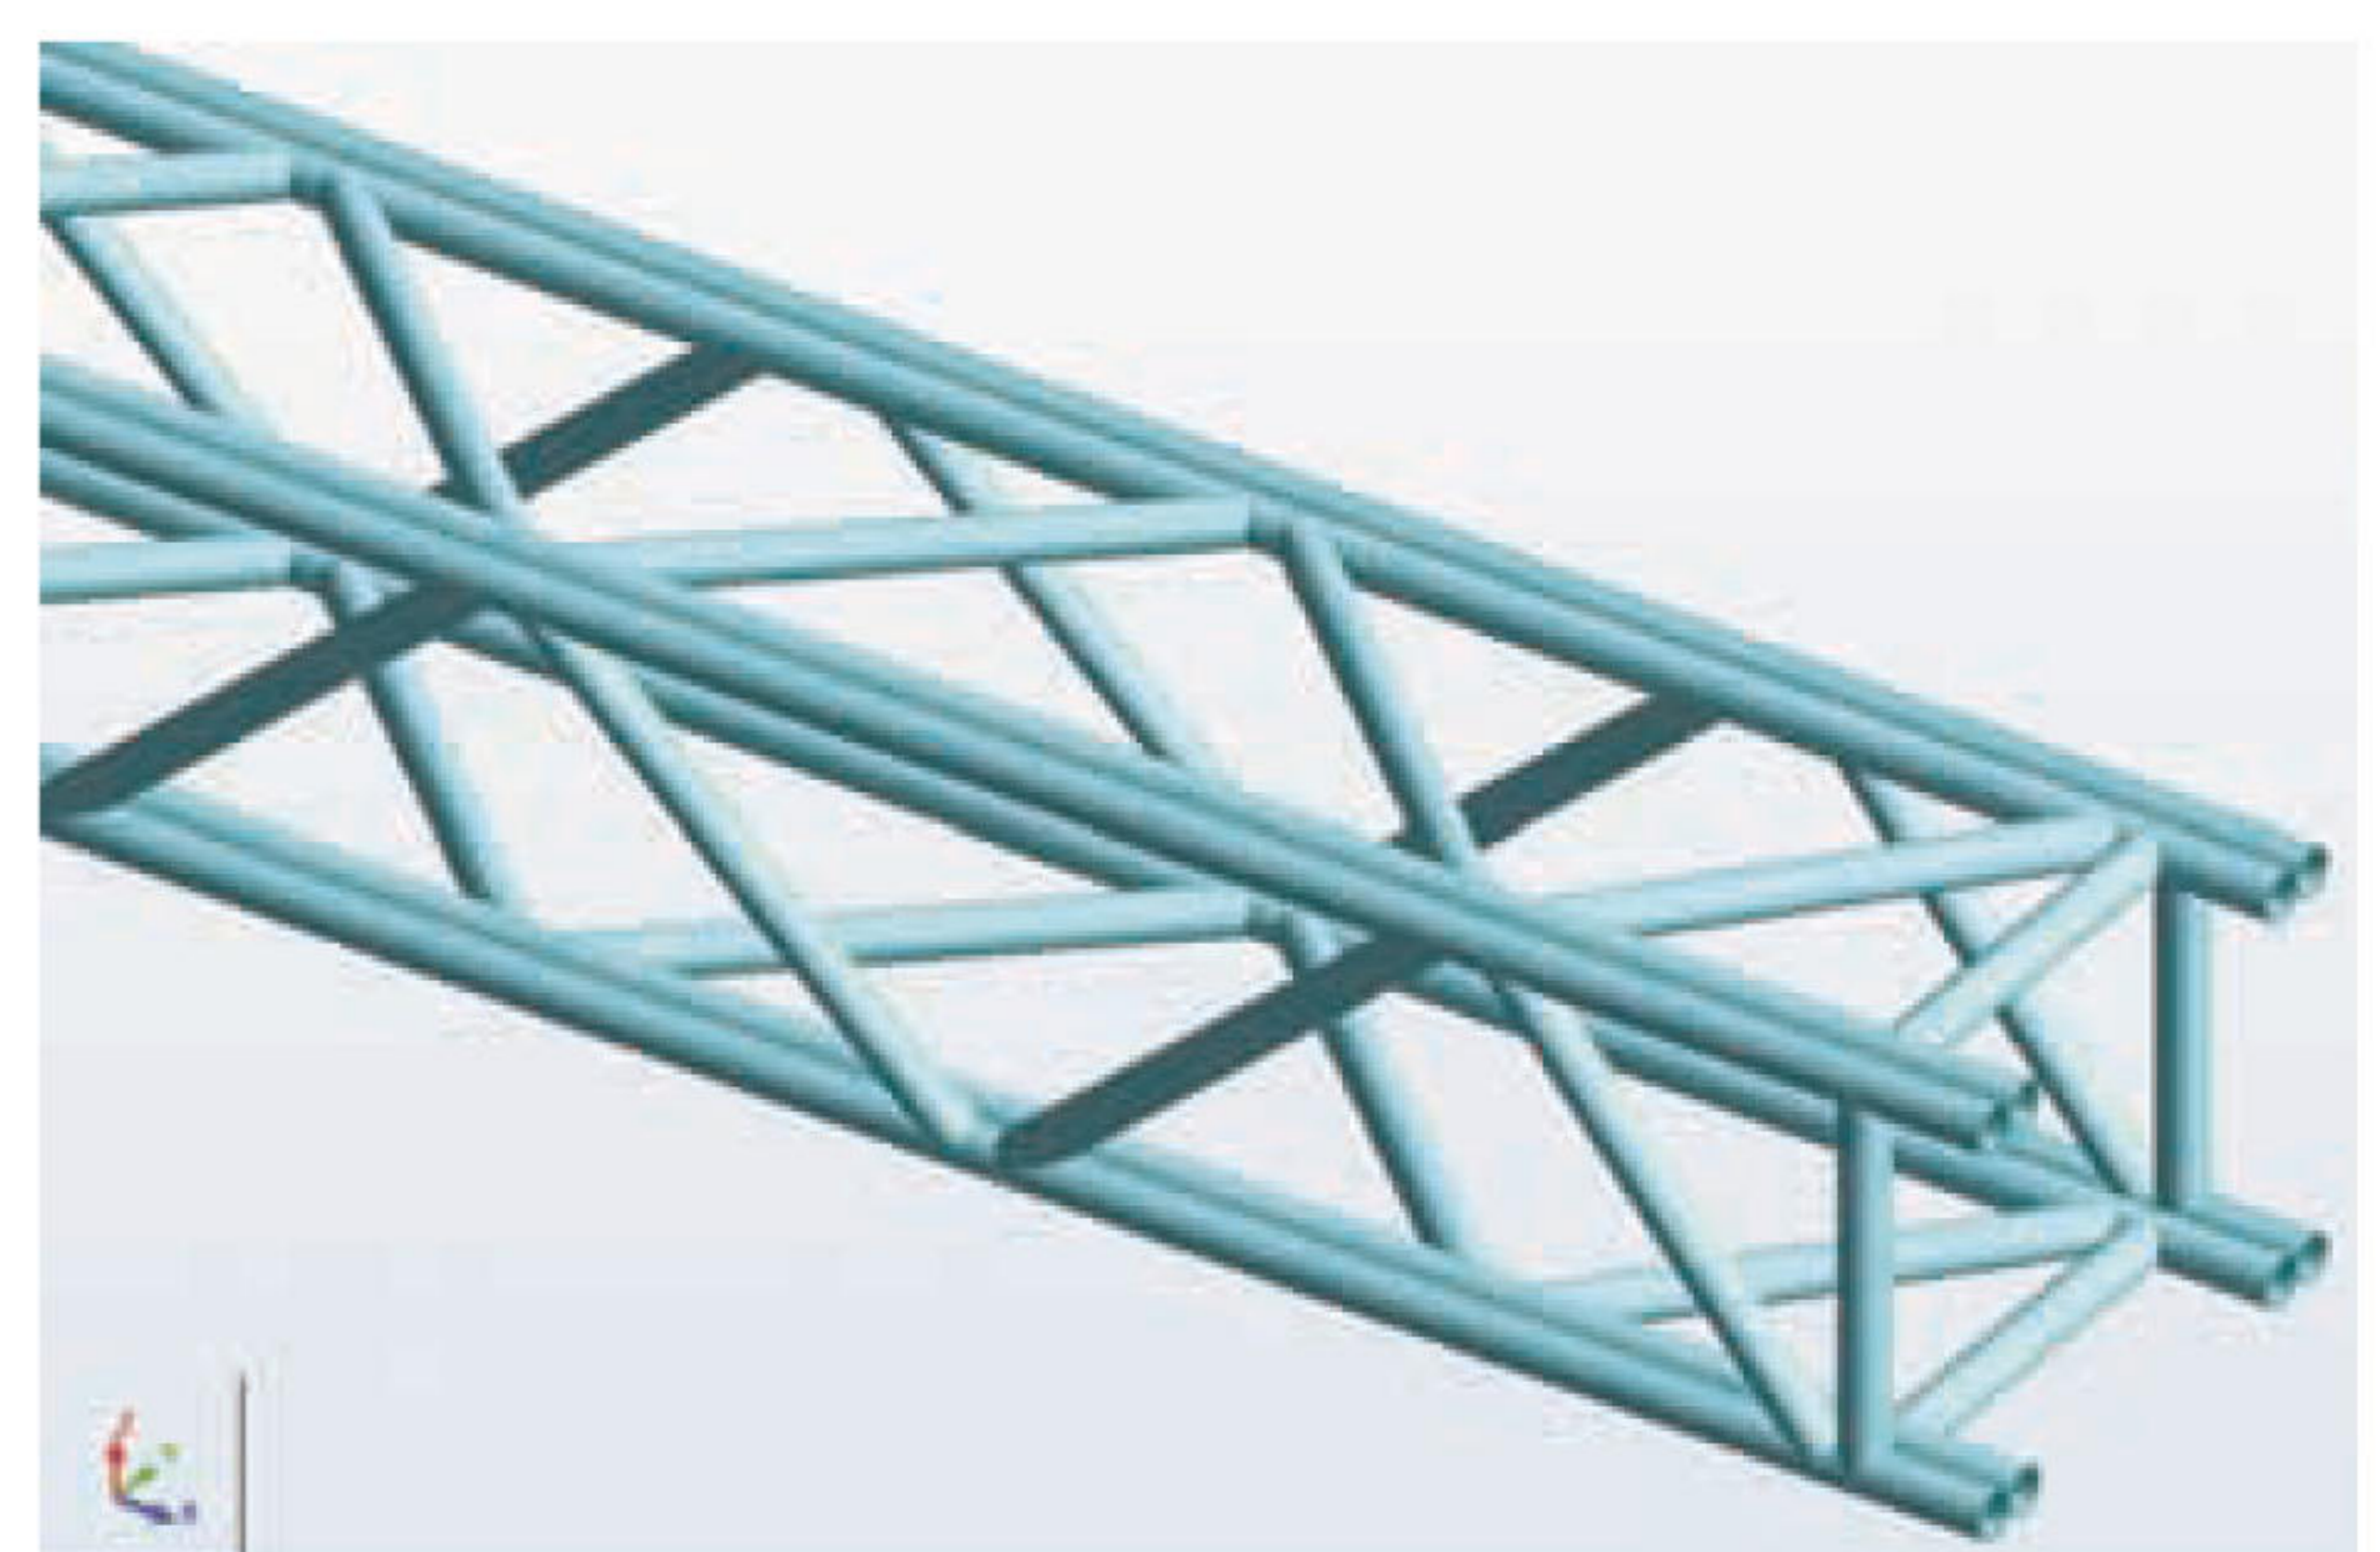

Structural geometry: **AutoCAD LT**

Static calculations: **Autodesk Robot Structural Analysis**

Project: temporary industrial hall at Bełchatów Power Plant

Selection and check of cross-sections

Scaffolding services General and sacral construction industry

Apart from modular scaffolds applied mainly in industrial settings, the company also possesses frame scaffolds. They feature quick and simple erection and dismantling and thus constitute a perfect solution for various general construction works.

Sacral construction industry

During renovation of monuments we ensure access to:

- church façades, also in places where scaffolding must be suspended, such as towers and bell towers,
- walls and vaults.

General construction industry

We provide services for large construction sites offering reliable supervision over the erection and dismantling of scaffolds and flawlessly prepared technical documentation.

Scaffolding services Unconventional applications

We provide erection services for non-standard structures based on scaffolding elements:

- winter coverings,
- temporary buildings from scaffold elements,
- support structures.

Comprehensive services for industry

Our affiliation with [Bilfinger Berger Industrial Services GmbH](#) facilitates the performance of comprehensive industrial services. We are able to cooperate with other companies from the group, which allows us to offer the following services:

- thermal insulation of buildings,
- facility management: stock management, construction site cleaning, operation of lifts and winches, etc.

BIS plettac, as one of the first Polish scaffolding companies, is proud to fulfill the requirements of the ISO 9001 standard – it has done so since 1997. The company currently holds the following certificates:

- ISO 9001:2008,
- SCC Petro,
- OHSAS 18001:2007.

We possess an Integrated Enterprise Management System. We constantly strive to maintain the high quality of our services while complying with the highest health and occupational safety standards.

Reference letters, awards and honorable mentions

BIS plettac has taken top honors in the **Scaffold of the Year** category in the competition organized by the Polish Chamber of Scaffolding. Moreover, our employees have won the **Scaffolder of the Year** award.

We are proud to have received the title **“Gazelle of Business”** (Gazela Biznesu) every year since 2003.

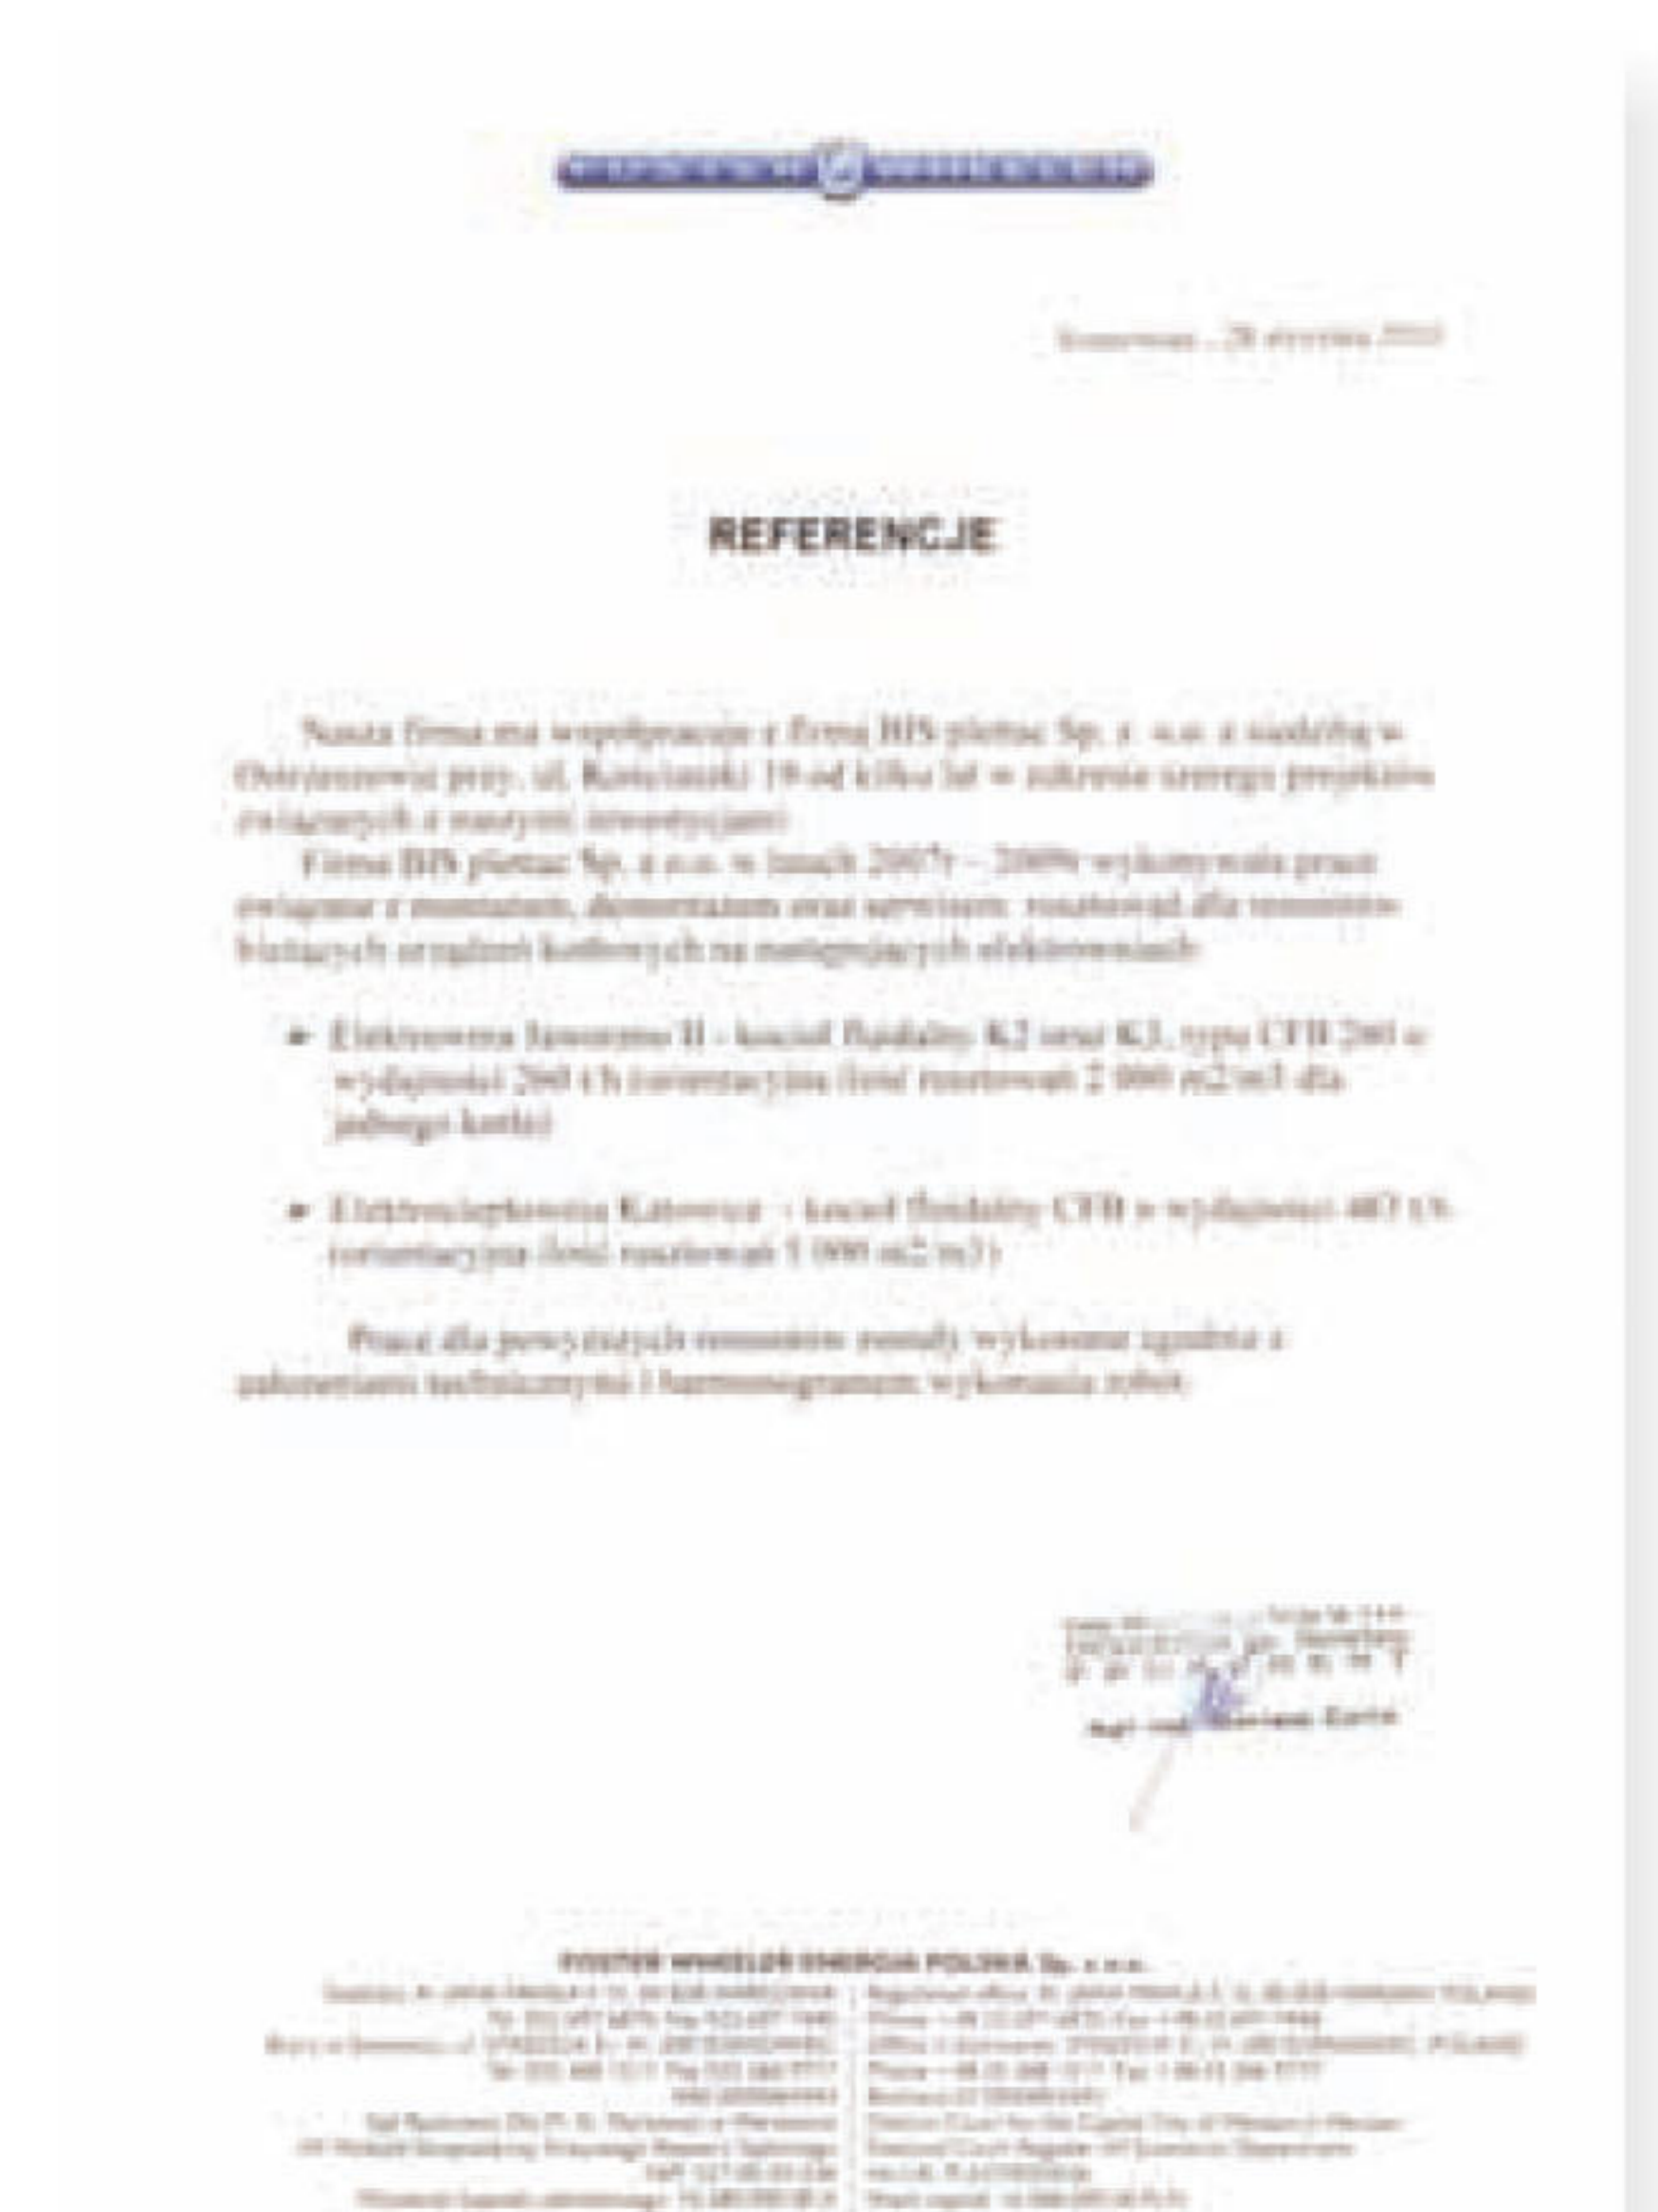

The title **“Transparent Company”** (Przejrzysta Firma) confirms financial credibility and honesty and enhances the company's good reputation and competitiveness.

Confirmation by the **Preem** Corporation of Sweden that the company meets all safety and work quality standards.

The highest quality of services for **Elektromontaż-Południe SA** provided in Halemba Power Plant and Tychy CHP Plant is evidenced by their letter of reference.

Works performed for **Foster Wheeler Energia Polska Sp. z o.o.** in Jaworzno Power Plant and Katowice CHP Plant resulted in our receiving multiple letters of reference.
